ECONOMIC & STRONG:	EASY INSTALLATION:	MINIMUM MAINTENANCE:	
NO FIXING REQUIRED:	HIGH VISIBILITY OF INVENTORY:	EASIER PRODUCT HANDLING:	
ALLOWS FOR MORE ILLUMINATION:	BRIGHTER WAREHOUSE:	FLOW THROUGH VENTILATION	

PUNCH DECK

Punch Deck is a new form of platform for use in racking. It combines strength, functionality and economy of regular corrugated steel decking with the advantage of 50% open surface created by a series of large flanged holes. These holes allow penetration of air, light, and fire sprinkler water. Punch Deck also provides a uniform flat storage surface that is free of raised protrusions.

MESH BINNING

Improve efficiency and flexibility by increasing the number of available pick face locations. They are easy to install and reconfigure at any time and no tools are required. Suitable for small parts of types.

MESH DECK DIVIDERS

Pre-welded clips on mesh decks, enable dividers to simply clip on. Advantages being that they are fast to install, flexible and easy to adjust. Ideal for order picking and bulky retail applications, and provide better stock organisation and identification.

MESH DECKS

Uniquely profiled for superior performance. Suits all rack sizes and manufacturers. Can eliminate double handling and reduce pallet hire costs. Light medium and heavy duty decks available. Interlocking Decks can utilise all your available space on back to back racking
