

# mekdrive

## the safer office Compactus<sup>®</sup>

mekdrive is revolutionising in-office storage. It is the lightest mechanically assisted mobile available by far. This keeps floor loads to a minimum, a major consideration in some high rise buildings. Its unique belt-drive technology moves bays effortlessly reducing operator strain and potential causes of injury. mekdrive combines high volume storage with quick, easy and safe access to stored items.

### Application

Ideal in any business or retail environment.

Specifications	Dimensions
Floor Fixing/Track Infill	No
Drive Type	Belt Drive
Max Movable Block Load	4 tonne

Bay Clear Depth	300mm Shelf height - 250DE, 300, 400, 450, 500, 600mm
Shelf Carrying Capacity	30mm Shelf up to 130kg With stiffeners 240kgs
Shelf Pitch	25mm

### Features

#### Better Distribution of Floor Load

mekdrive has multiple tracks allowing better distribution of floor loads and can be easily adjusted for floor settlement.

#### Unique Low Profile Tracks

Low profile tracks are not fixed to floor surfaces, so units can be easily relocated or expanded as needs require.

#### Operator Safety

The ergonomic hand wheel combined with ultra light operation reduces the risk of operator stress and injury. The unique belt drive technology provides whisper quiet operation.
